

Abstract

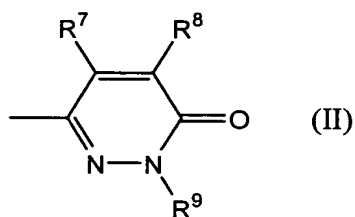

The present invention relates to pyrazole compounds represented by the formula (I):

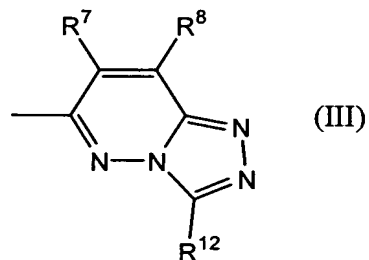

5

wherein R¹ represents phenyl which may be substituted, R² represents H, halogen, alkyl, alkoxy, alkylthio, alkylsulfinyl, alkylsulfonyl or substituted amino, Q represents CH or N, R³ represents H, alkyl or amino, R⁴ represents the formula (II) to (V):

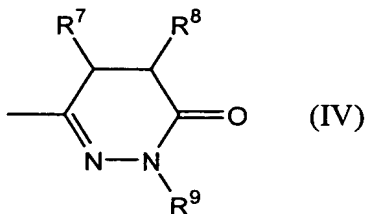

10

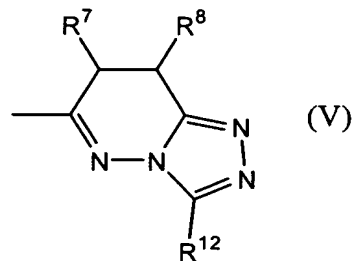

(II)

(III)

(IV)

(V)

15

wherein R⁷ represents H or alkyl, R⁸ represents H, alkyl or substituted amino, R⁹ represents H or alkyl, R¹² represents H, alkyl, halogeno alkyl or substituted amino, or pharmaceutically acceptable salts thereof, and a medical composition containing the same as effective ingredient.
